TOYOTA

MATERIAL HANDLING

Who are Toyota Material Handling?

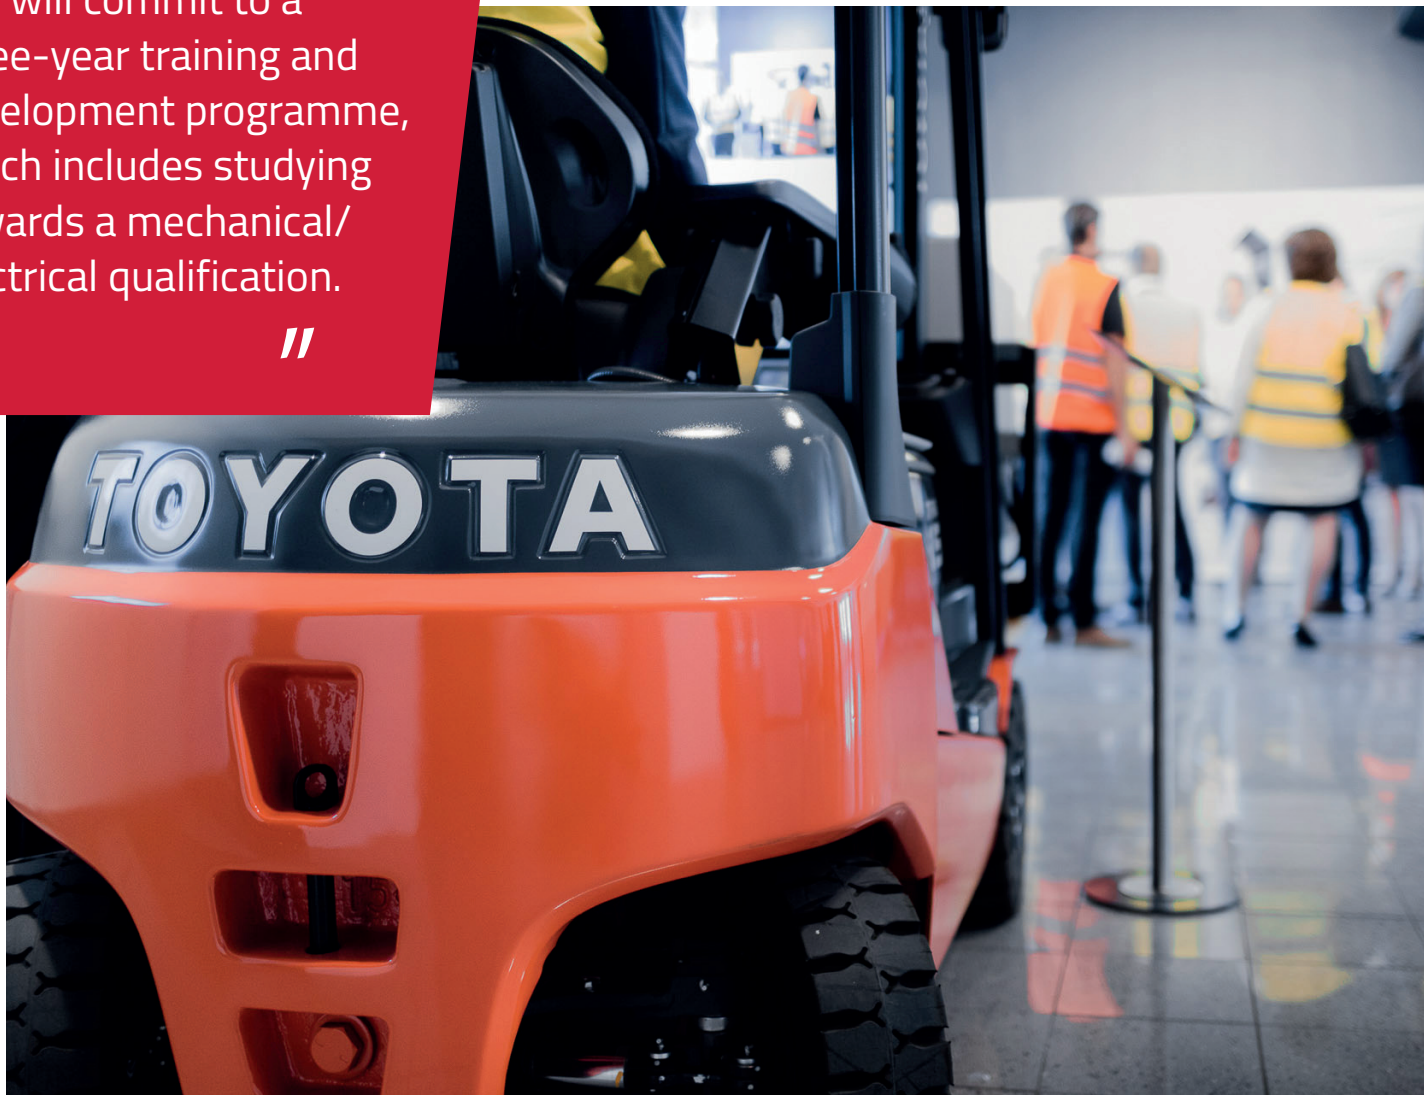

Toyota Material Handling is the global number one in material handling. We offer a range of equipment, including forklift trucks, warehouse equipment and automated solutions all produced by the Toyota Production System (TPS) to ensure quality standards.

We have over 500 service technicians across the UK in the field, on site and in our workshops, as well as offering a range of other services including: parts, operator training, hand pallet truck specialists, battery care and tyre care.

//

You will commit to a three-year training and development programme, which includes studying towards a mechanical/ electrical qualification.

//

A Toyota Apprenticeship

An apprenticeship with Toyota enables you to learn how to inspect, maintain, service and repair all types of materials handling equipment including forklifts, warehouse equipment and automated trucks. You will also gain experience working with a range of battery technologies and truck telematics. During the apprenticeship you will work in different areas of the business and be supported by a mentor who will help you to develop your skills.

You will commit to a three-year training and development programme, which includes studying towards a mechanical, electrical and hydraulics qualification. In addition to receiving a nationally recognised qualification, you will develop skills and gain valuable on the job work experience. Training for this qualification will be a combination of college work and in-house training.

- 3 year training & development programme
- Gain a nationally recognised mechanical/electrical qualification
- Combination of college work and on-the-job work experience
- Gain access to a range of future career opportunities

“

The Toyota Apprenticeship scheme is such a good mix of learning and working at the same time, I learnt such a range of new things. It was great. ”

Zoe, Apprenticeship Graduate
